1. Claims 1-28, 32 and 36-46 are presented for examination.
2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.
3. Claims 1-28, 32 and 36-46 are rejected under 35 U.S.C. § 103 (a) as being unpatentable over **Dimitroff et al. (Dimitroff)** patent no. **6,209,023**, in view of **DeKoning et al. (DeKoning)** patent no. **6,480,955**.
4. **Dimitroff** and **DeKoning** were cited as prior art in the last office action. The rejections are respectfully maintained and incorporated by reference as set forth in the last office action.
5. As to claim 1, Dimitroff teaches the invention as claimed, including a method for collecting information for a computer system having a server, at least one device controller coupled to said server by a first communication channel, said method comprising steps of:

querying said server to identify all host bus adapters coupled thereto (col. 13 lines 1-16);

querying each host bus adapter to identify all device controllers attached on said communication channel (col. 13 lines 16-30);

issuing a read connection information command to said device controller and returning the connection results identifying said communication channel (col. 3 lines 8-39; col. 8 lines 40-64; col. 14 line 64 – col. 15 line 15; col. 15 lines 51-65); and

storing the returned connection results in a data structure (col. 15 lines 51-65).

However, Dimitroff does not teach a client coupled in communication with said server.

DeKoning teaches using a client or management station that connects and communicates with server to query status of storage devices (col. 12 line 49 – col. 46).

It would have been obvious to one of ordinary skill in the Data Processing art at the time of the invention to combine the teachings of Dimitroff and DeKoning to provide a client to communicate with the server because it would allow user to use a management station to monitor and manage heterogeneous storage systems.

6. As to claims 2-28, Dimitroff and DeKoning teach server identifier, host bus identifier, controller identifier, server identification table, world wide number (WWN), fibre channel arbitrated loop bus adapters, storage device array controllers, storage area network (SAN) (Dimitroff, figures 1-2; col. 1 lines 22-55; col. 3 lines 21-39; DeKoning, col. 3 line 50 – col. 5 line 65; col. 12 line 34 – col. 13 line 40).

7. Claims 32 and 36-46 have similar limitations as claims 1-28; therefore, they are rejected under the same rationale.

8. In the remarks, applicant argued in substance that

(A) Prior art does not teach "issuing a read connection information command to said device controller and returning the connection results identifying said communication channel"

As to point (A), Dimitroff teaches a host or initiator issues command to a bridge having a Fibre Channel front end coupled to the Fibre Channel interconnection medium and returns connection results identifying arbitrated loop address (ALPA) (col. 3 lines 8-39; col. 8 lines 40-64).

9. Applicant's argument filed on 09/16/2003 has been fully considered but they are not deemed to be persuasive.

10. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a).

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO

Art Unit: 2141

EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.
